

POLYFLOR™
COVERING THE WORLD

Education

Nottingham Girls' High School Nottingham, UK

PRODUCTS USED:
Affinity2⁵⁵ PUR

Affinity2⁵⁵ PUR luxury vinyl tiles from Polyflor were used to create a simple yet stunning floor design for a refurbished common room area at Nottingham Girls' High School.

The contrasting Champagne Oak and Jet Black Ash wood effect designs from the Affinity2⁵⁵ LVT collection were installed by local flooring contractors Slack & Co Floorcoverings Ltd at the independent school for girls near Nottingham city centre. A large square was created using the Jet Black Ash shade in the centre of the floor to contrast against the common room's white furniture.

Jeremy Dunn, Director of Finance and Operations at Nottingham Girls' High School commented, "We are really impressed with the design and performance of Polyflor's Affinity2⁵⁵ flooring and the effect it has helped us create in our vibrant refurbished common room."

The Affinity2⁵⁵ collection features a cross linked and UV cured polyurethane reinforcement (PUR) which protects the floor and allows for a simple cleaning regime, making it ideal for break out areas where food and drink is consumed.
